DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Crinon teaches the global motion compensation for compensating the background and foreground macroblocks in images. However, Crinon does not particularly teach or suggest the video decoder comprises a global motion computation unit for extracting a motion vector of a macro block unit from the additional information applied from the VLD, and computing a global motion vector using a local motion vector with respect to a background region in an additional information from the VLD; a time-based integration unit for extracting a frame type from the additional information, judging whether the global motion vector is integrated according to the extracted frame type to generate a judgment, and integrating a global motion vector from the global motion computation unit based on the judgment; and a global motion compensation unit for motion-compensating and stabilizing a recovery image using a global motion vector integrated by the time-based integration unit, see Figures 5 and 6, elements 310, 320, and 330 in the specification of the present invention, in combination with others as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
